PROJECTS

Business Reports — Sales Analytics & AI Reporting Platform (SaaS)

- Challenge:** Businesses struggled with manual spreadsheet-based workflows, resulting in delayed financial analysis and zero cross-dimensional visibility.
- Solution & Architecture:** Engineered a multi-tenant SaaS analytics platform using Next.js (Server Components, SSR) and Node.js. Architected a custom reporting engine and caching system to handle high-volume queries.
- Tech Stack & Infrastructure:** TypeScript, Next.js, Node.js, PostgreSQL, Prisma ORM, Zustand, Tailwind CSS, Vercel, REST APIs
- Business Value & Impact:** Processed 100,000+ annual invoices, replacing manual tracking with real-time dashboards to save businesses 15+ hours weekly.

Think File — RAG-Based Document Intelligence Platform

- Challenge:** Teams wasted hours searching and querying institutional knowledge across large, unstructured document repositories.
- Solution & Architecture:** Built a full-stack document search tool using Retrieval-Augmented Generation (RAG), vector databases, and secure user authentication, reducing search times by 70%.
- Tech Stack & Infrastructure:** TypeScript, Next.js, Node.js, Firebase, Vector Search, AI/LLM API Integration, REST APIs, Tailwind CSS
